**Remedial Course
Basic Concept in Physics
Brief note**

Remedial classes are often used to stress the basics in a subject such as Physics, math or language. They can help students who are having problems with advanced concepts to fully understand the basics of a subject. Students can also use them to catch up on material after a long break from education. It is useful tools to gain a more and complete grasp of difficult ideas or rules.

If a student appears to be significantly behind the expected level for a class, a teacher may require him or her to take a remedial class. These classes act as a "safety valve" for struggling students, allowing them to work at a more appropriate level, rather than failing because they are not at the same level as the rest of the class. Remedial classes can be a positive environment for students suffering from low-self esteem, as they encourage students to ask as many questions as necessary to understand a subject, rather than feeling pressured to learn everything immediately.

Department of physics introduce remedial class in Physics, as Student admitted for B.Sc. Course are from different streams like MCVC crop science and dairy science, Who find physics subject difficult to learn, for this class student are selected on the basis of their lowest merit in previous year appeared examination and on merit of subject test. Faculty member frame a syllabus which includes basic physics concepts. After implementation of this classes the slow learners are found to be benefited which clearly analyzed from a result of their final examination .It also builds interest in the subject of physics. The students are found to be increased their ideas which may as a result of their clear understanding of basic concepts in physics.

Remedial Course in Chemistry

Brief Note

Students from different streams such as MCVC, Dairy Science, Crop Science etc. having qualified their 12th examination are eligible for seeking admissions for B.Sc. course. As these students are from different streams, understanding Chemistry subject is tedious for them. In this regard Department of Chemistry has introduced Remedial Course in Basic Chemistry to help above said students to understand the basic concepts in Chemistry. The selection of students for this course is based upon their low merit in previous examination i.e. 12th exam. Faculty members prepare a syllabus which includes basic chemistry concepts.

After implementation of this course the slow learners are found to be benefitted which is clearly analyzed from their final examinations. Also interest in the subject of chemistry of these students is found to be increased which may be as a result of their clear understanding of basic concepts in chemistry.
