Yoga Report

This year the Yoga Demo and Practice Camp were held at Arts, Science and Commerce College, Kolhar on 10th Feb. 2022. The session was held in our gymkhana hall. Students from classes First year to Post Graduation in the celebration. The inaugural speech was given by the Principal Dr. Sopan Shingote sir who emphasized the importance of Yoga and physical exercises in daily life.

A group of yoga students performed several asanas. They also performed standing and sitting asanas. One could understand by watching their performance that they have been practising yoga for the last few years.

Some of the seniors even did some of the tough asanas. Our yoga teacher showed us some simple and beginner asanas. The session was really nicely organised. There were teachers all around us to help us in case we had trouble performing or understanding asanas. All the students participated eagerly.

Even our principal took active participation in yoga camp. Next, we were given classes of yoga. About its history, a century of origin, how it helped the common people. We were told that yoga helps increase concentration. Yoga demo was celebrated with great enthusiasm.

"Soil and water analysis"**

2021-22

Report

Department of Chemistry in collaboration with Krishi Vjdgyan Kendra, Bhabaleshwar runs A Certificate Course in "Soil and water analysis" for students. The main objective behind starting the Certificate Course was that the most of students belong to family with agricultural background.

Students in rural area are unaware about the condition of soil and water used for agriculture. By the use of excess fertilizers, insecticides, and pesticides the fertile value of soil is reduced. As a result of this the productivity of yield decreases.

The decrease in yield, financially weakens the farmer and also insufficient for country like India which has increasing trend in population. In order to make students aware of quality of soil and water used for farming, the department of Chemistry undergoes soil and water analysis activity through which parameters like pH, Conductivity, Salinity, DO, TDS, Turbidity etc. are verified. The report of such parameter is prepared. The faculty members explain the parameters and guide the students. Students of the department help in the activity by providing soil and water samples from their farms.

The department organizes visits to KVK Bhabaleshwar. The faculty members and students interact with the faculties of department of soil and water analysis KVK Bhabaleshwar and share the information regarding above said a certificate course.

Yoga Report

In the academic year 2021 22, the gymkhana department of the college organized a three-day Yoga and Pranayama camp for girls on 29, 30 and 31 December 2021. 30 girls participated in this camp. The purpose of this was to give the students of the college scientific training in Yoga and Pranayama. In the said camp, the students learned yoga to keep themselves physically fit which can be done using the short period of time in the morning. Through this training, the students got the knowledge about all the necessary physical elements that are required during the student state. The said training was given every morning from 07:30am to 09:00am. The training showed improvement in the flexibility of the students and also helped to increase physical energy.

Doing pranayama along with yoga helps in the intellectual development of the students and keeps the mental balance better. Practicing pranayama daily will definitely benefit the concentration of the students. All these will help in the academic performance of the students. In the yoga and pranayama camp, the sports director of the college, Mr. Rahul Ubale, trained all the students and also instructed them to do the same practice regularly at home.

The support of Dr. Sopan Shingote, the principal of the college and Dr. Chandrakant Rudraksh, the vice-principal, was taken for the said camp. At the same time, the cooperation of all the staff helped the camp to be successful.

Introduction:

Sustainable agriculture practices may protect watersheds, maintain important habitats, and enhance the health of the soil and the water supply. On the other hand, casual approach and actions have serious irreversible effects. Long-term resource management is now more essential than ever. Demand for Agricultural products rises along with the global population. Due to its close relationships to the global economy, human societies, and biodiversity, agriculture represents one of the most important conservation frontiers on the planet.

Vermicomposting is a method of preparing enriched compost with the use of earthworms. It is one of the easiest methods to recycle agricultural wastes and to produce quality compost. Vermicompost is stable; fine granular organic manure, which enriches soil quality by improving its physicochemical and biological properties. It is highly useful in raising seedlings and for crop production. Vermicompost is becoming popular as a major component of organic farming system.

Objectives:

- To attain basic knowledge and basic requirements of vermi production.
- To acquire efficient and effective management of organic waste.
- To make the student aware about different ways to manage organic waste.

Details of Course:

Department of Zoology, Arts, Science and Commerce College, Kolhar started a twelve-week skill based course on Vermicomposting. This Course was designed to learn, explore and apply sustainable techniques in the present time to develop a method of converting organic waste into manure. This course was specially designed for all the UG course students of any department. In the year 2021-22 30 students were admitted and successfully completed the course.

This was a skill based course conducted for four days a week where lectures were delivered from Monday to Thursday between 4:00-4:50 PM. For the practical Knowledge students were introduced with vermicompost unit that run into college. The students handle a culture of earthworm and vermicompost during practical session. The Department has signed a MoU with Anand Agri Biotech, Durgapur for guidance and experiential learning. Under this MoU, department had organised a field visit to the Anand Agri Biotech, Durgapur. The department has developed a vermicomposting unit in the campus where practical based activities were conducted. In this vermicomposting unit the students learn various steps in vermicomposting from bed preparation to compost formation. After completion of theory and practicals examinations were conducted and the students were awarded with certificate of completion.

The course was conducted under the guidance of Dr. P.D. Pulate, Head, Department of Zoology and was coordinated and facilitated by Prof. Miss. A.N. Shinde.
