Report of Activity/Programme

Academic Year: 2023-24

Topic: Workshop on 'Intellectual Property Rights (IPR)'

Date: 17th January, 2024

Time: 10:00 am.

Venue: Seminar Hall

Organized by:
Department of Chemistry,
Loknete Dr. Balasaheb Vikhe Patil Pravara Rural Education Societies
Arts, Science and Commerce College, Kolhar
Tal- Rahata, Dist- Ahmednagar

Theme of the Programme: Workshop on 'Intellectual Property Rights (IPR)'

Objectives of the Programme:

The objectives of an Intellectual Property Rights (IPR) workshop typically include:

1. **Raise Awareness:** Increase awareness and understanding of the importance of intellectual property rights among participants.
2. **Educate on IPR Concepts:** Provide participants with a comprehensive understanding of various forms of intellectual property, such as patents, trademarks, copyrights, and trade secrets.
3. **Legal Framework:** Familiarize participants with the legal frameworks and regulations governing intellectual property at local, national, and international levels.
4. **Application Process:** Educate participants on the practical aspects of applying for and obtaining intellectual property protection, including the procedures for patent filing, trademark registration, and copyright protection.
5. **Protection Strategies:** Explore strategies for developing effective intellectual property protection strategies, considering the specific needs of different industries and sectors.
6. **Case Studies:** Share real-world case studies and examples of successful intellectual property strategies and challenges faced by organizations and individuals.

Introduction of Programme:

Intellectual Property Rights (IPR) refer to the legal protections granted to the creators and innovators of intellectual property, which encompasses inventions, literary and artistic works, designs, symbols, names, and images used in commerce. The primary purpose of IPR is to incentivize and protect the fruits of human creativity and innovation, fostering economic development and ensuring that individuals and organizations can reap the benefits of their intellectual endeavors.

Key components of IPR include:

1. **Patents:** Protect inventions and discoveries, granting exclusive rights to the inventor for a specified period.
2. **Trademarks:** Safeguard distinctive signs, logos, and symbols that identify and distinguish goods or services in the marketplace.
3. **Copyrights:** Protect original literary, artistic, and musical works, giving creators exclusive rights over the use and distribution of their creations.

4. **Trade Secrets:** Guard confidential business information, such as formulas, processes, strategies, from unauthorized use or disclosure.

5. **Design Rights:** Provide protection for the visual design and aesthetics of products.

The significance of IPR lies in its ability to stimulate innovation, encourage investment in research and development, and promote fair competition. By granting exclusive rights, IPR offers creators and inventors the assurance that their efforts will be rewarded, leading to a continuous cycle of innovation and progress.

However, IPR is not without challenges. Balancing the rights of creators with the public interest, addressing issues of infringement, and navigating the complexities of international agreements are ongoing considerations in the field of intellectual property.

In conclusion, Intellectual Property Rights play a crucial role in fostering creativity, protecting innovation, and contributing to the growth of economies worldwide. The delicate balance between providing incentives for inventors and ensuring public access to knowledge remains a dynamic and evolving aspect of IPR.

Details of the Programme:

A workshop on Intellectual Property Rights (IPR) was organized under joint Aegis of Department of Chemistry and Student Development Board, Arts, Science and Commerce College, Kolhar on 17th January, 2024.

The resource persons for the workshop were **Dr. Bharat G Kardak** (Co Founder and CEO, Venkatesh Edutech Pvt Ltd, Office No.- 412, 4th Floor, World Trade Center Tower 2, Kharadi, Pune), **Dr. A. B. Pawar** (Librarian, Arts, Science and Commerce College, Kolhar) and **Dr. V. R. Kadu** (Department of Chemistry, PVP College, Pravaranagar)

Session-I

The workshop was commenced with the Inaugural session where **Miss. Rani J. Gaikwad** (Department of Chemistry) delivered the welcome note and introduced the theme of the workshop.

The key note address was delivered by **Dr. Bharat G Kardak**. He stated the importance of Intellectual Property Rights (IPR). While IPR provides exclusive rights to creators, it also demands a delicate balance. Striking the right equilibrium between protecting innovation and ensuring access to knowledge for the greater good is a continuous challenge. It requires a nuanced understanding of the legal landscape, ethical considerations, and the global interplay of intellectual property frameworks.

Speaking from the chair, **Dr. H.R. Aher** (Principal, Arts, Science and Commerce College, Kolhar) introduced the vision and mission of the college. He focused on-

The Pillars of IPR:

1. **Patents:** Shielding groundbreaking inventions.
2. **Trademarks:** Safeguarding brand identities and consumer trust.
3. **Copyrights:** Preserving the expressions of human creativity.
4. **Trade Secrets:** Nurturing confidential business innovations.
5. **Design Rights:** Protecting the visual aesthetics that define products.

Session-II

In the second session, the Resource person **Dr. A. B. Pawar** stated that essence of IPR lies in its ability to encourage and reward innovation. By providing creators and inventors with exclusive rights, we create a playing field that inspires individuals and organizations to invest their time, resources, and talent into pushing the boundaries of what is possible.

Yet, in this journey of protection, we must also tread carefully. Balancing the exclusive rights of creators with the greater good, ensuring fair competition, and addressing the challenges posed by a rapidly changing digital landscape demand our attention.

Session-III

In the second session, the Resource person **Dr. V. R. Kadu** stated that IPR is not confined by borders. It is a global concept. Understanding its international dimensions is key to fostering a fair and equitable environment for innovation on a global scale.

As we delve into the discussions and workshops on IPR, let us remember that what we protect today is not just a creation; it is a catalyst for tomorrow's advancements. By respecting and embracing IPR, we contribute not only to the individual rights of creators but also to the collective progress of society.

At the end while interacting with the students, the resource persons resolved many doubts raised by the students.

Mr. B. M. Pehere (Head, Department of Physics) proposed the vote of thanks.
